

**Annex 2**  
**to the General Conditions of Storage Access**  
**“Definitions“ of bayernugs GmbH**

Working Gas Capacity	total share of storage space in kWh apportioned to the storage customer as the maximum working gas capacity within the framework, scope and term of the respective Storage Contract and the conditions thereof
Auction Procedure	in the auction procedure the bidder submits a binding offer to the trading platform store-x with the aim of concluding a Storage Contract. The contract is concluded when the know-down occurs at the end of the auction procedure
Withdrawal Capacity	maximum gas volume per hour in kWh/h made available to the storage customer for withdrawing the gas volumes previously injected by the storage customer within the framework, scope and term of the respective Storage Contract and the conditions thereof
Withdrawal Curve	determines the maximum withdrawal capacity proportionately to the level of working gas capacity of a storage customer
Banking Day	day on which commercial banks are open for normal trading in Munich
Pressure Specifications	are given in bar and specify – unless otherwise indicated – the gauge pressure above the atmospheric pressure of 1.01325 bar
EEX Settlement Price	the EEX Settlement Price is the settlement price which is established by the exchange on a daily basis to value open positions
Injection Capacity	maximum gas volume per hour in kWh/h with which the gas volumes supplied by the storage customer at the transfer point can be injected in accordance with the framework, scope and term of the respective Storage Contract and the conditions thereof
Injection Curve	determines the maximum injection capacity proportionately to the level of working gas capacity of a storage customer
Constraint/Bottleneck	the total storage capacity and/or injection capacity and/or withdrawal capacity are, for whatever reason, not available or only partially available
Gas	natural gas in the respective quality agreed upon
Gas Properties	properties of gas agreed upon

Gas Volumes	are the quantities of gas in kWh which are injected and/or withdrawn for the storage customer
Gas Day	period from 06:00 h of a calendar day to 06:00 h of the following calendar day
Gas Month	period from 06:00 h of the first of the calendar month to 06:00 h of the first of the following calendar month
Gas Week	period from 06:00 h of the first calendar day (Monday) of the calendar week to 06:00 h of the first calendar day (Monday) of the following calendar week
Trading Platform store-x.net	internet platform for secondary trading with storage capacities for natural gas; reachable at <a href="http://www.store-x.net">www.store-x.net</a>
Heating and Fuel Gas	gas which is needed in the storage facility for the technical execution of injecting and withdrawing gas. For each storage product the corresponding gas volumes are either supplied by the storage operator or are to be supplied by storage customer
H-gas Transport System	is the upstream or downstream pipeline of a network operator including all pipelines and technical plants which serve the transport of gas; here: the H-gas transport system of the network operator bayernets GmbH
Calendar Month/Month	period from 00:00 h of the first of a calendar month to 00:00 h of the first of the following calendar month
Calendar Day/Day	time from 00:00 h of a calendar day to 00:00 h of the following calendar day
Calendar Week/Week	period from 00:00 h of the first of a calendar week to 00:00 h of the first of the following calendar week
Calendar Year/Year	period from 00:00 h of the first of a calendar year to 00:00 h of the first of the following calendar year
Border Price	is the border price for gas as published by the Federal Office for Economics and Export Control (German: <i>Bundesamt für Wirtschaft und Ausfuhrkontrolle</i> ) for the respective month
Network Operator	is, in the scope of these General Storage Access Conditions, the operator of the upstream or downstream network (H-gas transport system) connected by a network connection point; here: bayernets GmbH.
Nomination	registration of gas volumes to be injected or withdrawn within certain time periods
Network Operator Nomination / Transport Nomination	registration with the network operator of gas volumes to be transported within certain time periods

Prequalification	procedure for qualification of a potential storage customer to be added to the bayernugs trader list
Renomination	change to confirmed or rejected nominations
Security	security to safeguard the fulfilment of claims by bayernugs to the storage customer, such as for example a bank guarantee or other suretyship. These include both securities provided within the framework of the prequalification procedure as well as those provided pursuant to § 21 of the General Conditions for Storage Access ( <i>German: ASZB</i> ) after conclusion of the Storage Contract.
Credit Support Provider	legal entity that provides the Storage Customer with a security.
Storage	injection of a certain volume of gas into the storage facility for storage and withdrawal (heat equivalent) of the previously injected volume of gas from the storage facility
Storage Facility	underground gas storage facility at Wolfersberg, including storage pipelines, technical plants and other constructions of an underground natural gas storage facility, which is connected to an H-gas transport system via a network connection point
Storage Year	period from 1 April, 06:00 h of a calendar year to 1 April, 06:00 h of the following calendar year
Storage Capacity	injection and/or withdrawal capacity and/or working gas capacity booked at bayernugs by the storage customer
Storage Account	account run by bayernugs as a storage operator in which the nominated and allocated gas volumes and the balance of injected and withdrawn gas volumes are recorded
Storage Customer	natural person or legal entity that has concluded a storage contract with bayernugs regarding the allocation of storage capacity
Scope of Gas Storage Utilisation	Global term for working gas capacity, injection and withdrawal capacity within the framework, scope and term of the respective Storage Contract and the conditions thereof
Hour	full hour

Transport	transport of gas volumes in the H-gas transport system of the network operator
Transport Shipper Code	a code assigned by the storage operator bayernugs for operative transactions and identification of a Storage Contract and the nominations/renominations
Working Day	week day from Monday to Friday with the exception of national public holidays and state public holidays in Bavaria. The 24 December and the 31 December of each year are also public holidays
Time Specifications	Central European Time (CET) including summer and winter time (German local time)

SAMPLE
