

Product description for the marketing of storage capacity at the underground gas storage facility Wolfersberg*

Version: 18.01.2023

Subject of this tendering process is storage capacity in the period starting April 1st 2023, 6:00 Central European Time (CET) until April 1st 2024 6:00 (CET)

1. The tendering process comprises one storage bundle (lot) of 500 GWh working gas capacity.
2. A lot contains firm storage capacity and can be used in accordance with the characteristic curve of the Gas Storage facility. The Gas Storage facility can be used flexible, without seasonal restriction and offers a short preliminary lead time for the switch of the operating mode (two hours each)
3. Storage capacity
 - a) Injection rate
250 MWh/h decreasing to 35 MWh/h
 - b) Max. withdrawal rate (decreasing according to proportionate storage curve)
328,75 MWh/h
4. The submission of the prequalification documents (KYC-documents_ see download area "current marketing measures") has to be carried out March 17th latest.
5. Bids have to be rendered on March 23rd from 10:00 CET to 11:00 CET and have to contain a binding period until 13:00 CET.
6. bayernugs informs the successful bidders via E-Mail until 13:00.
7. Storage clients have to provide, in addition to the gas volumes to be injected, a gas volume amounting to 2% of the gas designated to be injected to cover the own gas demand of the storage. The storage customers are liable for payment of taxes regarding these gas volumes.
8. In addition to the above, reference is made to the obligation of the storage client to meet the statutory minimum storage levels. The obligation to fulfil the legal requirements for storage levels is mentioned.
9. The above product specifications are subject to restrictions due to possible maintenance times as published on bayernugs' website.
